# VAN DE WATER BEATS RANDALL

Woolwine Has Apparently Safe Margin Over Lyon for District Attorney, Incumbent Supervisors are Renominated, Municipal Bonds Win Narrowly.

Samuel M. Shortridge of San Francisco yesterday won the Republican nomination for United States Senator by a plurality of over 30,000. William Kent of Kentfield, Marin county, is second, and A. J. Wallace of Los Angeles third.

Senator Phelan won the Democratic nomination without opposition; and the contest in November will apparently be between these two. Returns are coming in slowly. Not half of the State vote had been reported

at midnight. But the commanding lead of Shortridge, covering almost the entire State, is not likely to be overcome.

According to the Associated Press reports at midnight Shortridge was leading in thirty-two counties, Kent in eight and Wallace in five. Thirteen small counties had made no report. FOR CONGRESS.

Congressman Charles H. Randali. Councilman Ralph Criswell and Wallace Apparently Fails to Carry His the Republican nomination, the result from a tabulation of 244 scattered precincts showed Van de Water to be leading by over 1200, with Randail second, Criswell third and Reagan fourth. If Van de Water maintains this lead in the final tabuluation it will mean that he will contest the general election in November against Randail, whose name was also on the Democratic and Frohibition tickets. Van de Water was alsed of his opponents in Long Beach Pomona. Covina and parts of Pasadena. Randail's stronghold. He ran well shead of Reagan, his fellow-townsman, in Long Beach. Supervisor McClellan's contest in the Fourth District was the closest of the three, but he appeared to be pulling through at midnight over Samuel Kerns, Councilman Bert Farmer, Bolton and Avery. State Senators were nominated yesterday in the twenty-odd numbered districts of the State. In five of the districts the Republican majority is so great that no candidates offered themselves for the nomination. In four others the only Démocratic candidates were those who were registered as Republicans and were seeking the Republican nomination as first choice.

A glance at the candidates entered discloses that the Democratic State committee will not make a fight to to win the State Legislature this year, but will devote its whole energies to the national ticket. There will probably not be more than nine Democrats in the next Senate, and at least thirty-one Republicans.

J. F. Quinn of Eureka, former Democratic floor leader of the Assembly, was nominated yesterday for the Senate without Democratic opposition. He will be opposed in the First Senatorial District by H. C. Nelson, Republican.

to furnish Senator Reed with information as to the committee's budget for advertising in foreign language newspapera. He said the party had no appropriation for that purpose, but hoped to use some of its funda in that direction, having an item of \$49,000, which perhaps might become available.

In that connection, Hays turned over to the committee a letter from an advertising agency which stated that the Democratic organization was planning to insert 1000 inches of advertising in the best foreign language papers. He said advertising experts had told him there were 241 publications which might be placed in such a category and that it would cost \$225,000 to carry out the program outlined in the letter.

Senator New had written Prof. Hall asking his terms.
Replying from Washington, D. C., where he was employed by the Shipping Board, Prof. Hall said his "Democratic friends" had offered him \$7500 and expenses and were willing to give him \$10,000 for campaign work on behalf of the Democratic ticket.

Fred A. Britten, Illinois Congressman, failed to produce any evidence to support his recent charge that \$87,500 appropriated by the British government for entertainment purposes at the British Embassy in Washington had found its way into the Democratic National Committee's funds.

the Democratic National Committee's funds.
Under a grilling examination by
Senators Reed and Pomerene. Britten admitted he had no facts to
support the charge, and that it was
only his personal idea.

Britten asked the committee to
subpoena Thomas W. Lamont,
owner of the New York Post; the
heads of Doubleday, Page & Co.,
publishers, and officials of the Western Newspaper Union, a syndicate
supplying "hoiler plate" to newspapers. He presented an advance
proof sent by the plate syndicate
to newspapers offering them, free of

is said to be an argument in favor
of the League of Nations. He believed British interests were financing League propagands. The committee aummoned the heads of the
Western Newspaper Union.

Congress Committee was seeking to raise \$500,000 independently of the national campaign committee. Of this sum, he said, \$400,000 was for use in the present campaign.

He said the committee had received one contribution of \$5000 and two of \$2500 each. The average contribution was \$40, Fess added.

Fess raised a laugh when he testified that his Republican committee was sending out copies of the speeches of Senator Reed, Democrat. "I thought they were good ones, quite a number." he added.

Miles H. McMillan, Chicago manager for the Western Newspaper

ager for the Western Newspaper Union, was unable to tell the committee who paid his concern for the proposed distribution of a fiction serial devoted to the League of Nations, and which was brought to the committee's attention by Representative Britten earlier. He agreed to telegraph E. C. Johnson, New York manager of the union, for the information.

manager of the union, for the information.

The Senators evinced considerable interest in the methods of the newspaper concern, the questions bringing out that readers of the country papers taking the plate service had no means of knowing who paid for it. Mr. McMillan told Senator Kenvon that the Union had handled the Mt. Clemens news bureau service on the Ford libel suit, but had sent out nothing on the bill in Congress to regulate the packers.

stand and testified W. J. Cochran, publicity man of the committee, had asked him to approve a plan for sending the story, "Uncle Sam of Freedom Ridge," to country newspapers.

He told Cochran, he said, to get prices, which Cochran estimated at \$15.000.

He had heard nothing more of the matter until it was brought up before the committee, he said.

Senator Edge asked if it was not a violation of the Corrupt Practices Act to send the story out with nothing to show who paid for it.

White declined to answer without first consulting an attorney.

In a lively exchange of repartee with Senator Reed he explained he had made up the quotas himself in May, 1919, after consulting with State leaders and that the amounts were two or three times what he hoped to get, the figures being set high so as to spur the boys on.

Senator Edga, Republican, New Jersey, asked Mr. New if there were any cases of speakers seeking work from both major parties. The witness produced correspondence with prof. John O. Hall, formerly of Willannette University, Salem, Or. which he said, furnished an example of this practice.

BERLIN, Aug. 31.—Although the BODIES OF

belief is spreading that the Entente with the enlistment of small friendly nations bordering on Russia will swing a final effort to crush Red Bolshevism this winter. Evidences of such a plan are seen in many lands, but the most important is seen in the effort to realign the Balkan nations.

For a week European political centers have been buzzing over the formation of a "little entente," with speculation as to whether the large entente would oppose or support the suggested union of Rumania, Hungary, Serbia and Czecho-Slovakia, because, when such an actual alliance was formed, it could combine with Gen. Wrangel and the revolting Ukrainian peasants. This undoubtedly brings a successful final attack against the Bolsheviki. NATIONS IN ACCORD.

big international questions, has gone to Bucharest.

Maanwhile France, which had been cementing friendship with Hungary and fearing that the small Entente by its declaration of neutrality in the Russo-Polish war was hostile to the French Baikan program, sent Marshal Joffre to Bucharest. According to one report, it was actually a railroad train race between Marshal Joffre and Benesch.

The Rumanian situation is complicated further by the idea of revenge which has animated every Hungarian and Rumanian since the Rumanian occupation of Bukowina and the off-expressed views of Hungarians later that a conquest of Rumania was necessary to wipe out that national diagrace.

He Knew.

She is a talkative young school-teacher and he a Hoosler surgeon, who is not much given to speech. Recently when he operated on her, her chattering preceding the operation almost drove him mad. After the operation, though, he forgot all about that and did all he could to alleviate her suffering.

The fourth day he dressed her wounds and made her comfortable in every way he could. Then she began to chatter and asked him question after question, the last one being, "Doctor, how am I really now?"

He remembered his experience with her talkative little tongue before the operation. "Oh, you're getting along splendidly," he retorted. "In fact, all the suffering you will now have to endure is just to keep quiet."—[Indianapolis News.

Her Ubiquirous Husband.

Men are a clannish lot. At any rate, that's what one woman thinks, and with very good reason. One evening Brown had motor trouble on a lonely spot on the road where he found it impossible to reach a telephone to notify his wife. As the hour drew on toward midnight that lady became very anxious, and finally she telegraphed to five of her husband's friends: "George hasn't come home yet. Am worried. Is he spending the night with you?"

Meanwhile Brown had managed to get his motor going and a little after 12 he arrived home. Then came the answers to her telegrams she had sent. In effect, all five answers were the same: "Yes; George is spending the night with me."— I Boston Transcript.

That's the Question.

Madge: I am suing a young man for a dozen kisses that he stole. My lawyer says they're worth \$20 apiece. Jack: How does he know!— [Boston Transcript.

Action asserted to the control of t Strikes and disturbances in the Teschen coal fields, the situation in Silesia, virtual suspension of the Hungarian supply, little as it was, and, finally, Austria's inability to enforce the situation of the Hungarian supply. Hungarian supply, little as it was, and, finally, Austria's inability to enforce even the meager contractual supplies from Bohomia, have prevented the hoped-for accumulation of a modest fuel reserve during the summer months. Public utilities of Vienna are reported to have but a week's reserve of coal at a minimum consumption. The last Austrian pigitron oven in operation has just drawn its fires for lack of coke. Into this situation has been injected a curious business phase, resulting from the increased value of the crown on foreign change. In the late winter and early spring the crown dropped as low as 350 to the dollar on private exchange. Encouraged by this a small export trade was hourished. Austrian factories, famous for certain forms of finished articles, began to resume operations on a limited scale, foreign buyers seeing a good business chance in the low crown value, against standard moneys.

BUSINESS CHANCES—Wanted. WERE ABLE TO GET CREDIT.

Manufacturers were able to get advances of credit to secure-coal and needed raw materials. It was a good apeculation for foreign values. Then the Minister of Finance, Dr. Reisch, dropped a hint one day, during a debate in the Assembly, that it would be wise if Austrian retail sellers were to raise their crown prices to the equivalent of foreign values. They did it. A Butt of clothes that cost from 2000 to 4000 crowns rose in price to from 18,000 to 18,000 crowns. Everything else went up in proportion.

PLAN KILLED ITSELF.

PLAN KILLED ITSELP.

Then the government, acting on the same principle, is reported to have gone on the Zurich exchange, which controls crown quotations, with large amounts of foreign money and forced the crown ug. Their efforts were assisted unexpectedly by an influx into Austria of foreign money speculators. Appreciation of the moneys of the other countries of Central and Eastern Europe, made this their last field for speculation. Pounds, dollars and francs became plentiful with small demand and the crown rose in value until the official price was 128 to PLAN KILLED ITSELF. Retail prices continued to go up, so hat with the rise in the crown cut-ing foreign values one-half, the blan literally "cut its own throat."

price mark of 2000 crowns. But they were not sold.

The next step in the reaction hit the basic industries. The few factories running have begun to curtail or close down as orders are canceled and new contracts fall to come. The Ministry of Socialization is besieged with requests from manufacturers, to be permitted to discharge employees, it being reported that as high as twenty a day have been recently received.

An Indianapolis youngster who attends an eastern college came home recently for a few days. His mother, of course, cooked up all his special dishes and the youngster rejoiced as he sat down to the well-filled table. "I'll tell you, John." began his father, beaming at the boy, "the happiest time in most people's lives is right when they are eating, isn't it?"

John looked at mother, who had acted as cook, and then at the rest of his family. "Yes, it is," he agreed, "provided that they are eating with some beople for whom they actually care." — [Indianapolis News.

The House also voted, 47 to 27, to expunge from the House journal all proceedings of August 21 with reference to action on the suffrage ratification resolution, with the exception of the roll call of that date and the point of order raised by Speaker Walker that there was no quorum present.

tion was accomplished.

The first step was the motion to expunge from the journal of that day all reference to the proceedings upon the suffrage ratification resolution. After this was carried 47 to 37, with six not voting, a motion was made and carried that a certified copy of the resolution, the original of which is in the hands of the Senate, be spread upon the journal. Representative Riddick, floor leader of the ratificationists, made the point of order that the resolution was out of the hands of the House and now a part of the Federal Constitution through proclamation of Secretary Colby. He was overruled by Speaker Walker.

The House by a viva voce vote then adopted a motion to reconsider its previous action upon the resolution. Motion was then made and carried to concur in the action of the Senate in ratifying the ratification resolution.

DANZIG, Aug. 31.—As a result of the Bolshevist drive into Poland, accompanied everywhere by ruthless destruction of property and the con-facation of hospital supplies, the en-

facation of hospital supplies, the entire organization built up to fight the spread of typhus has been wiped out.

The work done by the American army unit detailed to Poland from Coblenz a year ago has been destroyed. The ceaseless efforts of the unit to make the hospitals clean, to supply them with beds, linens and medicines, and to stamp out the typhus-bearing vermin, has been made useless.

American officers agree that another typhus epidemic is bound to follow the Bolshevist occupation, which brought unclean armies into districts that had been practically cleared of the disease.

The invaders were armed with rifles, presumably those captured by the Uster Volunteers on the occasion of threatened rebellion, and several Nationalists fell before the entire Catholic community, including many women, rose in defense of their locality.

The rifle fire of the invaders was returned with revolvers. Severe fighting was not interfered with for some time by the military.

The Crumiin road district, where mill workers live, became the scene later of disturbances and all night long the old Park Road district was a hattle ground. The roll of homeless Catholic families was considerably swelled by the hurning of thirty more houses.

### DR. HEIST'S DEATH PROVES HIS THEORY.

To die according to his own proved theory was the fate of Dr. George D. Heist of Philadelphia, who spent his last hours discussing germs with the protecting qualities

of the human blood.

Dr. Heist, who was a research

of the human blood.

Dr. Heist, who was a research worker, succumbed to cerebro spinal meningitis at the Jewish Hospital. The disease had been one of his special studies and as he talked with his attending physicians he described the symptoms of the approach of the end, which he had proved scientifically he would not be able to withstand.

Dr. Heist's work showed that immunity or susceptibility to a particular germ in any individual could be shown by testing the power of the individual's blood of killing, or failing to kill, the particular germ. The method is now known as the Heist-Lacy method. By the method which he had invented Dr. Heist proved that he himself was susceptible to cerebro spinal meningitis.

The physician was a research worker in the Jules E. Masthaum Research Laboratory of the Jewish Hospital. In his brief career he made many important contributions to medical science. His research work on pneumonia, in association with Dr. Solomon Bolis-Cohen, had attracted widespread attention.

He was one of the few men who had isolated the germ of infantile paralysis. With Dr. Myer Solis-Cohen and Dr. John A. Kalmer, he made a study of that disease. His most recent work on diphtheria has not been published.

The most important discovery of Dr. Heist was in connection with

not been published.

The most important discovery of Dr. Heist was in connection with the power the blood possesses of killing or inhibiting the growth of germs. Working with others he found that this power to kill the germ of infantile paralysis was possessed in high degree by rabbits, who do not take the disease, and was absent in humans, who are susceptient in humans, who are suscept

CURIOUS WOMAN. The announcement by an Oakland judge that the testimony in the Clark trial would be unfit for a woman to hear brought such a jam of skirts at the next session of court that two women were hadly hurt in the crush at the door. The courage and daring which women indicate in such cir-cumstances is marvelous. They are almost fearless in the presence of the naughty.

SAME OLD STORY. Brooklyn street-car strikers insist on osed shop and refuse any advance in wages based on the revenues of the com-pany. The theory is that the employer must pay a certain wage, even if he hasn't the money or the business to do it with. Out of all this will probably come much ing, a few killings and the destruction of considerable property. In the finals men will go to work on an open-shop basis and fares will be raised. The public will be the ser and nobody will gain.

THE BLAZE OF GLORY.

On account of a shortage of water power and electrical energy the power administrator at San Francisco has shut off for one month all electric signs and all external and internal illumination of buildings that is purely for ornamental or display pur es. The water and power are needed in agriculture and industry and just now there is not enough to go 'round. Business men who would reach the public can do so by using the advertising columns of the papers instead of putting up a hundred-foot electric sign on top of Nob Hill. Even the Bim queens will be denied the blazing production of their names in front of the cinema palaces. The powers that be have decided that an electric sign is not a necessity to living. While the electric current may be used to operate an ice cream freezer it is not to be used to boom a fancy drink in letters of fire. The blaze of giory is a fine thing in its way, but, after all, it is a

THE LADY VOTER. THE LADY VOTER.

New York papers who have been taking straw votes to find out what the average woman will do in politics have thus far discovered that the lady voters are two to me in favor of the League of Nations and they consider it a leading issue. Several Republican women were found who were rather disposed to vote for Gov. Cox because they felt that the purposes of the League would be attained quicker through his success than through Senator Hard'ng. Otherwise they greatly preferred the Senator. Out of some hundreds of women interviewed not half a dozen were deeply concerned with prohibition. In New York City itself the majority of the women appeared to be against prohibition, but they were more concerned with the cost of liv ing as an issue. After all, the women are about the same as the men when they go

to the polls and no party will have the EXTRAVAGANCE ERA ENDING. "Tis a mad world, my masters, but it's not as mad as it used to be. "Write me down an ass." said old Dogberry many years ago, and for quite a while after the sig of the armistice many Americans acted a wanted to be written down that way. They indulged in senseless extravagance. Wage-earners paid \$12 for silk shipts and \$16 to \$20 for shoes. Diamonds glittered on horny hands and workmen rode to their jobs in \$2000 automobiles. It's a whole ing was one of near-ineanity on the part of ation. It was occasioned chiefly by the lief felt at the end of the war. Thousands of people who had been forced to save during the period of conflict and at the same time enjoyed big wages found themselves with the means to go on a spending spree. The unwise indulged in it; the sensible kept their savings in Liberty Bonds. Many of the spenders have come to the end of their monetary tether. They have had what they pall a good time and now they must forego the luxuries for which they made such a mad grab after the ex-Kalser chased him self into Holland. With the ending of the era of extravagance is likely to depart also eaning toward Bolsheviam, The workers recognize that they have to work and of are not so sure but that it's pleasanter.

E UROPE WANTS HARMONY.

Although the present aspect of Eu is belligerent, the impression is growing that comparative peace will prevail within a short time. Despite the strong talks which notes written by other ministers a general war is impossible if the various peoples a

now as they were in 1914, and the will to fight no longer exists. War means that taxes must remain excessive, food costs high and hatreds be expanded. The people of Europe desire to see taxes reduced, the price of food cut and the gospel of hi burned. In a word, they want harmony. Sinister forces have been at work ever since the armistice was signed to keep Europe in a turmoil. If one could penetrate far enough behind the scenes it might be

disclosed that the same agencies which have been attempting to throw a monke; wrench into the Franco-British entente have been equally busy at Warsaw, Mos cow, Flume and other storm centers.

It is becoming more and more apparent that Poland has been used as a pawn by unseen powers which have been abl to play upon the passions of premiers and Naturally, the inference is that these powers are Teutonic. The ex-Kaises has been very silent of late in his retreat in Holland. He probably has not been plotting personally. But even when he was mind the mightlest of the mighty he was run by a clique. That clique has not taken kindly to effacement and undoubtedly if has helped to stir many of the pots of trouble that have been boiling in Europe ever since the thrones of Hapsburg and Hohenzollern collapsed.

The royalists of Germany and what used to be Austria-Hungary are not without their influence, even in these republican days, nor are they broke. Only by keeping Europe embroiled can they hope to regain their former power, and one may be sure they are by no means idle. But the peopl will insist on peace.

THE UNION TERMINAD.

In passing resolutions declaring for an early decision on the union terminal matter and in favor of the findings of experts the Los Angeles City Council has acted for the best interests of the city as a whole. The city is mindful of the desire of the railroad companies to protect their own interests and of the financial burdens which they are bearing, nevertheless in the ques which vitally affects the city's growth and development, it manifestly believes that all the city must be considered rather than the private interests of any individual or

The City Council went definitely on reord Monday when it declared its judgment to be that the decision should be made in accordance with the universal findings of experts whose training and observation have made them authorities. To get a clearer idea of the conclusions of State lead to them the Council has asked Mr. nontechnical language at an early session

Bion J. Arnold, the world's foremost aua thorough survey of local conditions about port on his findings. Mr. Arnold stated unqualifiedly that the Plaza site is the only ogical site for a union terminal in Los Angeles to meet both the present needs of the city and those of the much greater metropolis of the future.

Engineer Sachse made a two-year investigation of the Los Angeles problem and sub-mitted a report which pointed out that the Plaza site possesses overwhelming advan-tages over any other that could be chosen. Other engineers have made similar findings. The City Council, therefore, is acting wisely and for the interests of all the people of the city in declaring in favor of the opinions of unbiased experts rather than of those men who have private interests to serve or those who have only meager in-

WHAT WE OWE TO THE PACIFIC.
While we pat ourselves on the back ecause of the prodigious growth of Los Angeles let's not lose sight of one of the big factors for the great development. The Pacific is one of the city's greatest assets. and other ports which also have grown trenendously since the century opened. That vast ocean on which commerce seemed leep in the nineteenth century is destined to become the busiest of the seven seas. Between this coast, where the fin sets, to China, where the dawn comes up like thunat any period since Magellan's ships swept through the straits into the silent sea that until then had been unknown to white men's As the Pacific comes use America's problems connected with it inrease. This country is the leading Pacific power. Its entire western boundary is washed by the ocean; it holds Hawaii, the crossroads; it has a naval base in Samoa, and the Philippines, three thousand islands are under its control. Three great nations America, Great Britain and Japan, are vast ly interested in the Pacific. They are the leading naval powers of the world and all are constructing bigger warships with bigger guns than the world has heretofore It's to be hoped that doesn't mean that the Pacific is to be an ocean of war.

THE MAYFLOWER. Christopher Columbus only discovered America. The Mayflower peopled it. That famous vessel brought over a deckload of the finest ancestors that any nation ever had. It is therefore very proper that the men and women of two hemispheres should celebrate the three-hundredth anniversary of the Mayflower's historic journey. It is like observing one's own birthday-only more so. The Mayflower was less than 150 feet in length, but she must have had a thousand grandfathers on board, judging from the records of our best families. And every man among them must have had two ree chairs to sit on. The Grand Rapids furniture factories were obliged to run a night shift in order to make all the antique chairs that were brought over on the Mayflower. That ship was furnished in carved walnut from jib to rudder. So far tile section is small in proportion to its more impressive than the Ark.

OUR "GROWN-UP" CHILDREN.
Are our modern children too grown-up? One hears so many distribes against th modern boy and girl, their precocity, worldly knowledge, lack of discipline, excessive liberty, etc., that one might suppose the rising generation to be well on the way to

It is true that our modern boys and girl are vastly more sophisticated than their parents were at the same age. It is true that they have much more liberty. Boys of 14 often seem like young "men of the world" and stagger their elders with their sophisticated aplomb and self-confidence modern boys and girls are really well in formed, are very earnest students of serious subjects and have a very definite sense of responsibility. Perhaps it pleased the sentimentality of the elders to see them remain children longer, to remain dependent and uninformed, tremendously respectful and naive, but if their minds were capable of this quicker development, if they are able to take their place in the world with pleasure and success at an earlier age, who shall say that it is not all in the way of general advancement and progress?

Boys of 12 and 14 are thoroughly "posted" on a vast variety of subjects today which their parents had not begun to be interested in at that age. Not only along the lines of all kinds of sport, not only the names of all the picture stars, not alone on the modern dances and jazz music, but upon politics, public health, reform movements, science and invention, mechanics and all those subjects which combine to make modern life interesting. These subjects are discussed in the schools, essays are required upon them and school journals are published dealing with all the paramount questions of the day to a far greater extent and at a much younger age than was usual in the last decade. And the quick child mind finds these vital subjects of today very much to his liking and far more interest-ing than Latin grammars, dreary lists of geographical bays, gulfs, mountain ranges, rivers, dismal pages of history dates and all the purely mechanical side of learning which played the role in past methods of education. Schools have been made more interesting, the political debates assist in making geography and history more real and intimate, and it is natural that the average child-mind should have responded treatment which makes him profoundly interested in the questions of his own day and illuminates them for him

Of course, it is rather disconcerting for stodgy grown-up to discover that a 14year-old knows almost as much about things generally as he does himself-enjoys as much and rather more capable self-confi-dence; has formed opinions on a variety of subjects, and exacts more liberty of action and assumes more responsibilities than was ever considered possible or reasonable in past generations. But, apart from that, the innovation seems all to the good. The sort books boys get out of the library today are an interesting revelation. They are reading up on the spiritualistic controversy, on chemistry and mechanics, on political history, on architecture and city planning. on jail systems and criminology, on exration and survey, where formerly their most serious study would be, perhaps, natural history. Girls, too, with all the accu-sations of frivolity against them, with their fashionable clothes, modish hair, rouge and lipsticks, do not confine their interests to these precincts, to dances and sweethearts. They do that strictly on the side. But for serious studies we find little girls of 13 and 14 as variously well posted as the boys. They, too, are conversant with the modern movements, with politics, reform, industria questions. Moreover, even at that tender age many of them have very definite ideas for their future. And it doesn't take the form of exclusive matrimony, either. Most of these modern boys and girls show a very ture, and both rich and poor alike contem

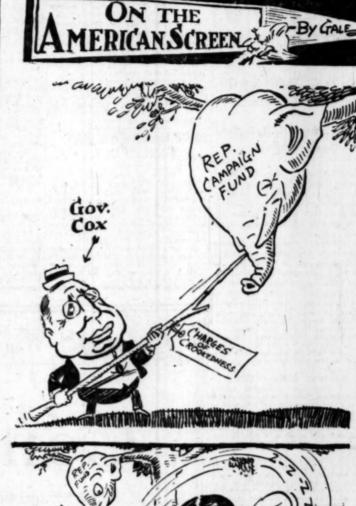

plate productive work in the world. When one considers the wide and deen expansion of the school curriculum during the last decade, the totally different conditions obtaining for the training of the youth ful mind, it is absurd to expect our children, with that added knowledge which is power, to remain modestly unsophisticated, ignorantly and romantically innocent, hum-We are teaching the children to think for themselves with marked success-and if sometimes they think to our confusion and disadvantage, to the embarrassment of our vanity or the jeopardy of our authority, we are perhaps merely sacrificed on the altar of the next generation's better progress. If these, our modern children, are relinquishing a little of their childhood, grow up a little sooner than we could wish, who knows but that it may mean for them a longer, fuller and more complete manhood that by leaving Santa Claus and the fairles a little earlier they may be able to make

more reasonable and just. THE GREATER GLENDALE.

The city of Glendale is entitled to more than passing notice on the character and extent of its census returns. This northern gate to Los Angeles indicates an even more wonderful growth than all the other approaches to the greater city. Ten years ago it was a rather straggling clump of cosy homes. All told, it numbered 2746 congental souls. When the census was taken in May this year it appeared that this had swollen to 13,536! The increase of 392 per cent is the greatest reported from any city in the State and is the largest in America of any restricted community of homes

realism the more enchanting, the world

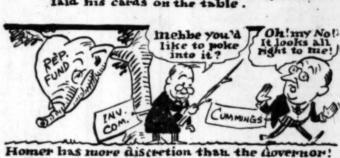

It is possible that there are other towns that have been speeded up to as great an extent by the addition or expansion of some notable industry. For instance, the auto-mobile trade has trebled the population of some of the smaller cities around Detroit But Glendale has few manufacturing industries. At times the citizens have arisen en masse and made vigorous protest against some factory invasion that was thought undesirable. Glendale is purely a community of homes. It is the city of white collars. There are few millionaires and no paupers. It is made up of the great middle class of home-brewed Americans who form the backbone of the nation. There are no districts in which foreign tongues are spoken. Glen dale is Bungalowville. In no city does this comfy pattern of home thrive to a more luxurious extent. There is not a great deal of business in Glendale. Its mercansize. This is because of its proximity to Los Angeles. The population is largely

made up of those who have their business in the greater city. It is Hometown. But how she grows! The building operations go steadily on to the tune of almost three million dollars a year. The construction permits have been running at the rate of nearly \$300,000 a month. No other city in America of its size can approach this showing, for practically all the permits are for homes costing from \$3000 to \$8000 each. There are few business buildings of industrial permits. In Brand Boulevard Glendale has the widest paved business thoroughfare in Los Angeles county. It stretches for three miles through the center of the town, clearing it into halves which pleasantly vie with each other in progress. Glendale might also be called the White Its business houses are mostly of glazed white brick and a creamy cleanliness covers the place like unto a mantle

Without detracting a straw from the magnificent growth indicated by most Southern California cities the exceptional record of advancement made by the Jewel City at the north door of Los Angeles is worthy of spe-

### RIPPLING RHYMES. THE RELEASE.

When Old Hiram Rumble was planted I sighed like a son of a gun, although I was rather enchanted to know that his troubles were done. Some symptoms of grief are expected when neighbors or friends pass away: we have to look sad and de-jected and give our emotions some play. When old Hiram Rumble was living he cornered all anguish and pain; each hour in its passing giving some joint an additional strain. His nights were lead-footed and sleepless, his days had the sem-blance of years; and if he was dryeyed and weepless 'twas because h had run out of tears. But now all his torture is ended, he sleeps in his tomb like a child; then why should our garments be rended and why should our wailings be wild? Abo him the blue grass is seeded, abor him the daisies have grown; ti heat of the summer's unheeded, the cold of the winter's unknown. Rheu matics may torture and rack us and put all our lives out of tune manners of ills may attack us, Hiram is strictly immune. knew little of sorrow when over his casket I stood; I doubt if old Hiram would borrow one hour of

MOSSES GATHERED

In a quiet way I felt my impor tance. Arriving in Washington I met in the Willard Hotel lobby my old friend, John S. Harris. We had been close friends and comrade Milwankes before the Civil War. He was then clerk in a clothing store, I was then clerk in a clothing store, I was book-keeper in a grain commission house. We had not communicated with each other for nine years. After a warm greeting and a discussion of old times I, supposing that Harris, who, while living in Milwaukee, was always dabbling in local politics, was now in Washington seeking a government office, said

local politics, was now in Washing-ton seeking a government office, said to him, "Now, John, is there any-thing I can do for you. Any place I can help you to get?"
"No, thank you," he replied. "But I am obliged to you for the offer. Maybe, however, I can help you. I suppose that you are here after some government office?"
"No," I replied, swelling with con-

"Indeed," he said. "I congratulate you. We will be 'lkely to see a good deal of each other."
"Will your stay here be long?"

said I. "For some years it will be," he answered. "I am a United States Senator from Louisiana."

answered. "I am a United States Senator from Louislana."

At the assemblying of the Forty-first Congress the contest for the Speakership was between James G. Blaine of Maine and Henry L. Dawes of Massachusetts, with Dawes leading Blaine by a few votes. A. A Sargent of California and I were the only Republican members from the Pacific Coast. At the urgent request of our mutual friend, Gen. Redington of Sacramento, we espoused the cause of Blaine, and Sargent and I adopted the California system of politics, "We place ourselves in the hands of Judge Peters of Maine—Blaine's manager—with liberty to Blaine's manager—with liberty to trade our votes on clerk, sergeant-at-arms, postmaster and doorkeeper in exchange for votes for Blaine." Blaine won the Speakership and he never forgot to whom he owed it. He allowed Mr. Sargent and me to choose our own places on com-mittees. Neither of us was treated mittees. Neither of us was treated as was the member of Congress from Ohio, who said that he had been in Washington for four months and had caught everything except the Speaker's eye. Mr. Sargent and

I were aiways accorded recognition whenever we wished to address tha Of all American statesmen of that Or all American statesmen of that day none more occupied public attention in his lifetime and none seemed to die so utterly when he died than James G. Blaine. He impressed his individuality strongly upon those about him, but it did not extend to those with whom he falled to come in personal contact. He did not lower his helm when the fight was on, but he did not hesitate to stoop to conquer. He was a born diplomat. He indorsed Sir Boyle Roach in saying: "What has a born diplomat. He indorsed Sir Boyle Roach in saying: "What has posterity done for us?" His motto was that of Danton: "De l'audace, encore de l'audace, et toujours de l'audace." If he had lived longer and had possessed more robust health he might have reached the Presidency, which was the goal of his ambition, for he was surely a great partisan leader, and neither his power nor his opportunities had passed their zenith when he was his power nor his opportunities had passed their zenith when he was

called away. Fernando Wood, once Mayor of New York City and for many years one of its Representatives in Con-gress, was, in graciousness and manner, in courteousness and speech and in costume, a gentleman of the old school. After the strictness of his sect he lived and died a Democrat, but all the darkeys about the Federal Capitol loved him for his kindly spirit and for the size and frequency of his tips. Among his favorites was a colored barber who attended in the cloakroom of the liouse of Representatives. Learning that Johnson-for so was the barber named—had a mother and sister in slavery in Maryland and that he was saving money to pur-chase their freedom, Mr. Wood chase their freedom, Mr. Wood passed the hat among his associates, collected \$200, added \$300 from his own pocket and presented it to Johnson, who, with his own savings, be son, who, with his own savings, became then the possessor of \$800,
which he deposited with Riggs & Co.
Mf. Wood next interested himself to
procure for Johnson a lease of the
barber shop at a Saratoga hotel,
from which it was estimated that
\$400 profit could be derived during
the season, thus making up the
\$1200 necessary to purchase the
woman and her daughter. Before
the season opened at Saratoga Ft. the season opened at Saratoga Ft. Sumter was fired upon, an extra se-sion of Congress was called and Johnson relinquished his Saratoga lease and was back in his place at Washington, ready to wait upon his Congressional patrons. "This is too bad," said Mr. Wood.

as he seated himself in the barber's "We will have to make up a little more money for you with which to buy your mother and sis-ter. Cannot you get the master to take a little less than \$1200 for

"Oh, yes, Massa Wood," was John son's cheerful reply. "He don fah to take \$800 for them now! "Well," said Wood, "you have got \$800, haven't you? You haven't spent any of that money, have you?" "No, indeed," replied the colored man, "it is all safe in Massa Riggs's

bank."
"Well, why don't you buy your mother and sister with it?" queried Mr. Wood.

The barber applied the lather vig orously to the Congressman's chin and replied: "Dar's no nurry, Massa Wood: 'deed and 'deed dar's no hur ry. Niggers is gwine to be mighty cheap befoh dis war is ovah, sah."

New Autumn Coats For Service and **Smartness** 

Perhaps one of the most serviceable garments in the Winter wardrobe is the coat. One may change one's frock several . times during the day, but oftentimes one's wrap is the same from morning till evening. Moreover, a coat that starts the season may easily be worn through the coldest winter days clear to the spring. We have, therefore, specialized our coats for service. Every coat we present fulfills a distinct need. from the short jaunty coat for sports wear to the wrappy looking coat for every festivity.

QUITE SHIFTY.

Edward B. Covington, captainelect for the 1920 season, is acknowledged one of the shiftiest and brainiest athletes who ever donned the moleskins in Southern California. On the eve of the Occidental game last year Covy was shifted from halfback position to quarter, and the way he performed in that tilt would indicate that he will be seen in the pivot position throughout the coming season. As a punter and open-field runner he is the peer of Southern California griditon heroes.

George Pooley and Hod Chambers are two stars of last year's eleven lost through graduation. Both played in the halfback positions, Marlon Wyman, a lineman, also graduated. With the exception of these three men, practically the entire squad is returning. Ex-Capt. Marvin Greathouse will more than likely be back.

Marked style changes in Men's Clothes for Fall

New style changes for Fall as correctly interpreted by Society Brand Clothes will be heartily welcomed by men who pay particular heed to their appearance.

The long vent in the coat has gone. Vents in modish suits this Fall will be noticeably shorter.

Body contours have changed. The high waist line and the pinched-in effect have gone.

Coats hang with greater fullness from the shoulder. The result is a pleasing effect of unusual ease and smartness.

These are the style features that mark this season's models in Society Brand Clothes.

This is the first day—the BIRTH day of a is the infallible receipe of permanent business success Greater Silverwood!

We are so happy to get into our new home that somehow we can't think much about business. We want our friends to feel that way about it, too.

We want you to come to our new home. We'll let you forget for today that we have clothes and shirts and hats to sell.

We look upon this big new building as a big new opportunity to be of better service. That's what business means to us—TO SERVE.

This is your store. We want you to feel a part ownership. We want your criticisms, your advice.

We want you to know our "Honor Pledge":-"to maintain that margin of better values, better service and better merchandise—that margin which

-this is our Conscience, our Honor Pledge, our goal of each business day."

The evident confidence of the buying public as reflected in this bigger and greater Silverwoods, is undeniable proof that this Honor Pledge Policy is right.

Most of all, we want you to come in and say hello today. TODAY IS THE DAY.

William Dowlan Hesitates.

After having made a picture which is pronounced by some critics as the best comedy of the year, and which is pretty generally acknowledged to have kicked up some new star dust in filmland, one is not surprised to learn that William C. Dowlan is standing between the two horns of a real dilemma.

Having made "A Chorus Girl's Romance," as Viola Dana's last release, in which Gareth Hughes sprang into even greater prominence than formerly, Mr. Dowlan is now considering seriously two offers from the independenta. One of these is from an established producer and another is an offer by the terms of which he will be financially backed as an independent producer. Exaggerated Advertising

Some merchants seem to consider it necessary to advertise in a super-lative manner, in order to bring people into their stores. Impossible announcements are made that cannot be fulfilled. Discounts, which if

deducted from the actual worth of the articles advertised, would result in a loss to the merchant. But sensible people know that the prices in such places are advanced sufficiently to permit the so-called discounts.

Do not be deceived by such alluring advertisements, because you will

certainly be disappointed with your purchase if you buy in such stores. Either the prices have been advanced or there is something wrong with the artcle. Nobody is selling a Trunk, Suit Case or Traveling Bag

actually worth a certain price for an amount away below its actual worth. A great many people are influenced by this exaggerated advertising only to be disappointed when they go to see the promised bargain which does not materialize.

INDIANAPOLIS, Aug. 51.—Senator Harding's statements as to how he would conduct the Presidency have thrown a chill into the Republican campaign in the West. Franklin D. Roosevelt, Democratic Vice-Presidential nomines declared in an address last night. "Visions of the Senate cabal, of insiduous power behind the Chief Magistrate, will not down," he said. "The Penroses and Watsons and Smoots and Lodges are at least no more popular than in the past. The people want a leader, not a syndicate Presidency,"

# Los Angeles Forward!

# Again Comes the Call Because the World Believes in You

The great business organizations who have established vast industries here believe in you.

The men and women who builded you and made you grow believe in you.

The people who have homes believe in you, Los Angeles.

Los Angeles, City of Sunshine, City of Happiness, City of Homes!—Los Angeles, the Center of the Land of Promise-the Capital of Progress and Prosperity!

More than two-thirds of the United States is nearer by rail to Los Angeles than it is to its nearest competitor on the Pacific Coast.

Los Angeles has a climate unexcelled for living, working, playing. Of the 365 days in 1919 only six were without sunshine in Los Angeles, and 217 were entirely clear and bright.

Great strides have been and are being made. The construction and improvement of a deep-water harbor for Los Angeles opens the city's doors to all the markets of the world. Two-thirds of the world population live in the lands bordering on the Pacific and much of this territory is more easily reached through the Port of Los Angeles than through any other American port.

With its equable fair weather, its advantages of location, and its natural resources of power and fuel and water, truly Los Angeles is the city WHERE NATURE HELPS INDUSTRY MOST.

And Industry is accepting the assistance of Los Angeles! New plants and fac-tories have been established here.

And as for building—the skyline of Los Angeles is changing every day! Palatial new theaters and office buildings; immense, beautiful hotels; splendid new store buildings all will open soon.

We shall be proud to show Los Angeles to her visitors and newcoming home-makers! We shall be proud of her new auditorium, her beautiful churche es, her schools, her streets, her stores, her welldressed people, her handsome buildings, her lovely theaters, because it is our Los Angeles, the wonder city of the West, the city of life and hope and sparkle.

# Los Angeles is Building— SOLIDLY, SAFELY, SUBSTANTIALLY -Building Industry, Business, HOMES!

TRULY, this is a big city, a real city, a vital city. It has more than its climate, more than its tourists—valuable as these are—industries, business, homes!

But It Needs MORE Homes!

—Thousands of families are coming—yes, even now are on their way—not to visit but to LIVE here, in Los Angeles (and in this name we include the suburbs and adjacent country districts.)

E VERY home helps every other E home, every business and every industry. So let us help these newcomers to find the homes they

Let us build on our vacant lots! Let us enlarge or otherwise improve houses already built!

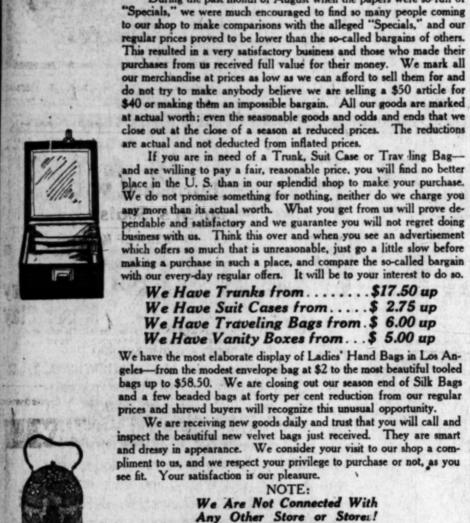

Let us make our OWN homes better, that they may inspire and serve as a worthy pattern for those who want homes representative of Los Angeles ideals!

THE BARN RAISING, AN OLD-TIME CUSTOM.

That the plain and homely cus-toms of ploneer days have a cherm even now was shown in Western wen now was shown in Western New York recently, when fifty men accepted invitations from a farmer to help "raise" the frame of a barn he was erecting. I, pioneer days barn raisings were frequent and de-lightful affairs. The timbers of the barn were made from native trees. In the early days they were hewn, but in later days the portable saw-mill made it easier to get out the:

wooden pins that held the frame together.

There was no pay for the workdone in a raising, save the chicken dinner at noon and the ample stores of food served at the supper that came when the frame was up. The day and work were given as the contribution to community development. Raisings were picnie affairs despite the heavy and at times dangerous work, but the entire neighborhood turned out, the women to help with the cooking, the men to do the work. After the huge timbers were up, the pins driven and the plates put on the frame, the rafters were up, the pins driven and the plates put on the rafters meeting at the proper point, not together as is the custom now, but against the ridge pole, as the timber between them was termed. When the rafters were put up in many places it was the custom of some rural celebrity to walk the ridge pole erect with a bottle of water balanced on his head, merely to show his sense of balance and daring. There was an aftermath with anti-Volstend features that took place after many raisings—[Ohle State Journal.

Back Achy? Feel "All Worn Out?"

RE you burdened from morning to A to night with a dull, nagging backache? Does any little exertion leave you "all worn-out"? Does it seem sometimes as if you just can't keep going? You know then, there is something wrong. So why not find out what it is and correct it? Very likely, it's your kidneys. Modern life with its hurry and worry, and lack of rest and sleep, throws a heavy strain upon the kidneys. The kidneys slow up and that tired, depressed feeling and constant back-

ache, are but natural results. You may have headaches and dizzy spells too, and annoying kidney irregularities. Don't wait for dropsy, gravel, or dangerous Bright's disease. Determine to be well and stay well. Use Doan's Kidney Pills. Doan's have helped thousands. They should help you. Ask your neighbor!

# These Are Los Angeles Cases:

E. Jefferson Street

Mrs. M. T. Negley, 1743 E. Jefferson street, eays: "I have used Doan's Kidney Pills and consider them a good remedy. My kidneys were weak and I had backaches. The kidneys werf weak and I had backaches. The kidneys acted irregularly and annoyed me constantly. I was so run down it was hard work for me to do my housework. I read of Doan's Kidney Pills and used them as directed. They were just what I needed and soon had my kidneys in good shape. My kidneys did not trouble me and my back was strengthened."

Ceres Avenue

Gustav Greenewald, 627 Ceres Ava., says: "Serious kidney, trouble compelled me to lay off work. My left kidney was particularly painful and at one time I was perfectly helpiess. Thinking it might be lumbang or rhaumatic pain, I treated for these aliments, but found no relief. After much suffering I began using Doan's Kidney Pills and the results were truly remarkable. After using two boxes of Doan's, I was absolutely cured." (Statement given January 4, 1912.)

Mrs. Jennie Smith, 391e Ascot St., says: "There is ne doubt about Doan's Kidney Pills being a good remedy. I had a sewere backache and pains in my kidneys. I fejt dull and run down. I had no energy, and often had rheumatic pains in my limbs. My kidneys acted irregularly and I knew they were the cause of the trouble. I read of Doan's Kidney Pills and used them. They were just the thing for my case and I was soon free from the aches and pains. I felt like a different person and my kidneys did not trouble me any more."

NO package of Doan's Kidney Pills is genuine unless it bears the mapleleaf trade-mark and the signature - "Jas.

West Sixty-Sixth St.

Henry Bier, 405 West Sixty-sixth street, says: "I have the greatest confidence in Doan's Kindey Pills. They helped me wonderfully when my kidneys troubled me a lot. I could not rest day or night because of the backaches and pains in my limbs. I ached all over. My kidneys acted too freely at times and then again were scanty. I read of Doan's Kidney Pills and used them. They just suffed my trouble and rid me of the aches and pains and regulated my kidneys. I am glad to recommend Doan's to others."

E. Twenty-First Street

Mrs. J. F. Fenner, 618 East Twenty-first street, says: "I have used Doan's Kidney Pills and found them to be a good remedy, when my kidneys were out of order and I had back-aches. The kidneys acted fregularly and caused me annoyance. I read of Doan's Kidney Pills and used them. They soon cured the trouble and put my kidneys in good condition. I gladly recommend Doan's to anyone in need of a kidney remedy."

Department store business is sertously hurt by rain in the forenoon, but rain in the early afterneon is a great help. Women retrain from starting on shopping tours in the first instance, in the second they are compelled to remain in the store, and they shop some more.

More lines of business, however, becom with sunshins. Architects, for instance, find that few people come in on gloomy days. It takes sunshine to fire the owner of a piece of ground with visions of a beautiful house standing thereon.

Still, a rainy June is highly profitable to a big, awning concern, because of the extra number of awnings that must be erected for Jane weddings.

# The Awakening of an Industry

Until the war, it is said that only 6% of the shipping from the Pacific Coast was in American bottoms. Today 86% of the traffic is handled by American ships.

America, once the leader of maritime industries, lost her pre-eminence about the time of the Civil War. She'ts now regaining it. Our merchant marine is the finest in the world. The awakened interest of Los Angeles business men in the development of Los Angeles Harbor is synonymous of the awakened interest the country over in marine shipping.

Capital has long found very profitable en ployment in ocean shipping. Today with modern steel vessels, modern safeguards and with established routes of travel, marine shipping is one of the least hazardous of all transportation

# Seventh and Broadway Building Company

During the period of the world war, building activities in Los Angeles practically ceased. Today we are several years behind the demand for high-class store and office space in the downtown business district. The modern 12-story "Class A" office, store and theater building now being erected by the Seventh and Broadway Building Company, a subsidiary of Loew's Inc., (a \$19,000,000 corporation.) will, in a measure meet this demand.

Location

The building is now being constructed on the southwest corner of Broadway and Seventh St., on which the Company has a 98-year lease. This corner is the center of traffic and the heart of the shopping district of the city. The continuing importance of this location is assured by the fact that the seven largest department stores and the seven largest banks are all permanently located within three blocks.

Protective Features

There is now available \$1,275,000, to be applied to the actual cost of the building. In addition, there has been executed by the company a bond of \$500,000, guaranteeing the completion of the building free of all liens and a deposit of \$100,000 has been made with the lessor, to guarantee the payment of the ground lease during construction. After completion net earnings are conservatively estimated at 3½ times bond interest and principal requirements. Furthermore, the full compliance by the company with all the terms of the ground lease, etc., is unconditionally guaranteed by Loew's, Inc., until the full amount of principal and interest due shall have been paid, Taking into consideration intrinsic values and guarantees we believe this issue is an exceptional real estate improvement bond investment. issue is an exceptional real estate improvement bond investment,

NEW YORK, Aug. 31.—The cleavage between rails and industrials, which has been the complex that the period of deflation of the steam more is rectally to date the process has been a gradual one and, without attempting to prophesy, it is to be hoped that it will continue gradually and witnout the disturbing effects that any sharp ready and witnout the disturbing effects that any sharp ready and witnout the disturbing effects that any sharp ready months in certain lines. This, in turn, will reduce ments in certain lines. This, in turn, will reduce ments in certain lines. This, in turn, will reduce the interest rate for future issues, so that the possibilities are that from now on the cost of finding captral will begin to go down, leaving present prices the highest that they are likely to be known for many rears to come.

This to the bond investor means but one thingnow is the time to buy bonds while the price is low and the returns are high. Delay will mean smaller restures. Here are likely compared the profession of the secondary motors and their behavious wastern and south-wastern and south-wa

National City Bank Believes Conditions Good.

bank points out that there is still a great amount of work in arrears an imperative demand for construcgoods to satisfy the wants of the world. As in the case of house-building, this work may be checked by rising costs, but that only means hat costs must come down, with he assurance that as they declin-ctivity will revive. BUSINESS SITUATION.

BUSINESS SITUATION.

"The general business situation," according to the survey, "in our opinion has been developing in a satisfactory manner during the past month, although this does not mean that present conditions are all that could be desired.

"It means that the general trend is toward normal and permanent conditions, and that existing disorders are no greater than might be expected in accomplishing the adjustments which are necessary. The crops are fine, which is a good foundation for domestic business and for international relations.
"The railroad situation has improved decidedly during the pastmonth and although far from satisfactory, gives promise of gradual betterment.

CASH TO STAY TIGHT. There is a better feeling in bank-circles as to the credit situation. aithough money will remain tight.

"A considerable degree of liquidation has taken place in merchandising shops in three months, and the fact that loans are practically unaffected indicates not only that the volume of business in the aggregate is heavily affected, but that the banks are carrying an unusual amount of loans which represent capital investments.

"The pressure for larger facilities in all lines of business has resulted in the use of earnings and credit to finance expansion, and it will take some time to free the banks of these commitments.

BANKERS CONFIDENT. "The feeling in banking circles is more settled and confident because of a belief that the spiral movement of wages and prices has been checked, and that this being true, the situation is in the way of working itself out. When the people of this country really set themselves to the task of paying their debts they are certain to accomplish something and

of paying their debts they are cer-tain to accomplish something, and nothing will help along that resolu-tion like failing prices.

"Nevertheless it is probable that the present deadlock over prices will be adjusted early enough to permit a large volume of business to be done, and unless these new price levels are lower than now it seems likely this trade will necessarily re-quire some expansion of oank credit.

The Japanese silks had been in favor for a long time with the manufacturers of this country, but it was well understood that the quality of the Chinese was superior, but it was not adapted for use in this country, because of the manner in which it was woven. An American manufacturer secured a moving picture reel showing the Japanese methods of manufacture, and as a result the Chinamen were induced to change theirs to a system to conform with the demands of the occidental customers, and the industry has accordingly taken a start than any other in the United Science of these tenderfoot operators.

Solve Lumber Problem.

The Swiss, among other European peoples, solved the problem of a continuous supply of lumber years ago. Zurich, in Switzerland, has a 2800-acre communal forest, regularly renewed by scientific forestation methods, which yields the community some \$20,000 a year, or about \$7\$ an acre. The annual "crop" of trees goes mainly for firewood. Thus forestry not only safeguards agricultural lauds against damage from the elements, and benefits the climste, but it also affords a direct, well-paying business.—[New York Evening Post.

DEVELOPMENT RAPID.

WORKING LIKE A BEAVER.

A beaver in a park was experimentally placed at work upon a tree twelve feet long and two feet aix inches thick, just as the town clock sounded the hour of noon. The beaver began by barking the tree a foot above the ground. That done, he attacked the wood. He worked hard, alternating his labor with dipn in his bathing pond. He bathed and labored alternately; then he atte his supper of bread and carrots which the keeper brought him, and paddled about in his ponduntil half past 5 o'clock. Ten minutes later, when only one inch of the tree's, diameter remained intact, he bore upon his work and the tree fell. Before it fell the beaver ran as men run when they have fired ablast. Then as the tree lay on the ground he portioned it out mentally and began to gnaw. He worked at intervals all night; cut the log into three parts, rolled two of the portions into the water and reserved the other third for his germanent shelter. The work done, he took a bath.—[Christian Science Monitor.]

A CHECK ON THE MILKMAN.

With the aid of an apparatus recently devised by Julius Horvet of the Minnesota Dairy and Food commission, it is going to be possible within the space of a very few minutes to state just how long the wily dealer in trick milk has worked the pump handle, or allowed the pump handle of the difference in freezing point between water and milk; and it will determine infallibly whether the consumer is receiving pure milk or watered milk or pure water to which a little milk has been added.—

FRESNO, Aug. 20.-Capt. John GEY. SAVINKOFF RECOGNIZED A. Shishmanian, son of Mr. and Mrs. G. N. Shishmanian of Fresno, is believed to be the man mentioned in the current issue of the New Armenia as the president of the newly created Amanus district of Armenia Minor. He is known to be in that zone in command of an Armenian detachment of the French Foreign Legion and in a letter under date of June 15 received by his parents here he mentions his assignment to another command on the eve of being discharged from the service.

Shishmanian enlisted with the Foreign Legion at the outbreak of the war and rose from the rank of private to a commission as lieutenant and the command of an Armenian detachment of the legion. He fought throughout the years of the war and was with Gen. Alenby's command in Palestine. Late reports indicated that he was fighting at Adana. He was wounded in action and has received the Crotx de Guerre from the French government. Setchel Fruit Company of Fresno brought \$4.34 a crate, it was announced yesterday by W. Flanders Setchel.

While Mr. Setchel states that the Beau brand handled by his company usually commands a premium over other brands of fruit shipped from the Fresno district, he considers the sale of yesterday a remarkable one, comparing favorably with the high prices reported received for Thompsons at the beginning of the season stated to be near the \$4.40 mark. The shipment sold at auction yesterday consisted of a car, containing 1000 crates which sold for \$4340, or \$4.24 a crate. The shipment left Wahtoke on August 15.

ARGENTINA REFUSES BRITISH OIL OFFER.

NWILLING TO SEE EXPLOITA TION TAKEN OUT OF HANDS

BUENOS AIRES, Aug 3.—Argen-tina has refused a British, offer of \$10,000,000 for the control of the government's petroleum producing operties, maintaining its traditiona attitude of guarding these deposits for the benefit of the nation. The offer was made by Frederick White, representing the Cowdray interests. While the government's petroleum fields at Comodoro Rivadavia' are producing approximately 200,000 tons of petroleum annually, the fuel shortage in the nation has given rise to agitation for more extensive development. A dispatch from London quotes Mr. White as explaining that President Irigoyen expressed himself as anxious for increased production but that he was unwilling to see the exploitation taken out of the hands of the Argentine people. While the government's petroleun tine people.
Other offers for these fields have

been refused in the past, including offers from North American pro-
